

VERSÁTIL  
SERVICES

## HISTORY

***Versátil-Services** was founded in 2006, working in the field machining and base machining, with a broad view of the market has diversified its range of actions aimed at the industrial area, we can count now on a consolidated versatility, where contributors and partners are always trully committed to have a quick and responsible response with our clients.*

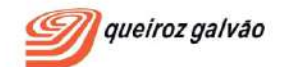

*Established ourselves as a company dedicated to industrial maintenance looking for versatility in our followings.*

***Safety / Quality / Speed / Efficiency, are part of our principles.***

Our special thanks to Mr. Paulo José O. Silva, for this successful project.

## OUR CLIENTS

# SERVICES

## FIELD MACHINING

Applied in various industrial sectors that have planning and logistics maintenance. We provide solutions for machines and equipment recovery through field machining, which means that we bring the service into the intervention spot, devices for facemills, mandrel, screw, or any type of machining with no need of total disassembling and removing to another machining center.

This technique turns into one of the most efficient ways to run the field machining and various equipment having mechanical characteristics, such as flanges, Shaft End, Holes, and Holes Threaded Flat Surfaces.

We all type of machining can be done in conventional machine, but with the features simplified as regards the assembly of devices and special arrangements.

- *Flange Face Machining flat-grooved / RTJ*
- *Milling metal bases*
- *Mandrel operations*
- *Pipes bevelling*
- *Rectified on track from dryer - Granulator*
- *Machining/ Grinding in crankshaft pin for ships*
- *Machining in axle shaft*

# SERVICES

---

## INDUSTRIAL MAINTENANCE

---

Our company has major clients in both, national and international markets. We carry out a industrial maintenance within different sectors: Petrochemical, chemical, petroleum, pulp & paper, metallurgical, mining, maritime and other industrial market segments.

- *Heat exchanger maintenance*
- *Off shore services*
- *Base machining*
- *Valve maintenance*
- *Spray metallizing*

# SERVICES

---

## INSPECTIONS

---

Equipment inspection and industrial maintenance is customized in order to satisfy the client needs, from planning to final report and Technical specs.

- *Equipment inspection*
- *Painting inspection*
- *Manufacturing inspection*
- *Watertightness inspection*
- *Boiler dimensional inspection*
- *Industrial climbing*
- *Placement of NR13*
- *Quality control*
- *Electrical inspection*
- *Instrumentation inspection*
- *Non-destructing testing (END)*
  - *Penetrating liquid*
  - *Magnetic particule*
  - *Visual test*
  - *Thickness measuring*
  - *Ultrasound*
  - *Identification of metallic alloys*
  - *Radiography*

## SERVICES

---

### LEASING

---

We work with specialized leasing for the industry area, as a lighting tower, vacuum truck, truck Munck, break-bulk cargo and other.

- *Lighting tower*
- *Vacuum truck*
- *Truck Munck*
- *Break-bulk cargo*

### SALES

---

#### SERVICES

Round carbon steel wire, alloyed and specials on demand

- *Profiles: roundeds / squares / hex*
- *Ground, hulled and polished steel*
- *Rolled steel for:*
- *Carburizing: SAE 8620-VB 20/4320 vm20 – 9315 VA 15/20 MnCr5.*
- *Processing: SAE 4140-VL 40/8640 VB40/4340 – VM40 - B – 16.*
- *Carbon steel SAE 1010 to 1060 for mechanical engineering use.*

#### PRODUCTS

In consideration for both chemical and metalographic necessities.

- *Forged steels to 35": Carbon and alloyed*
- *Carbon steel wire, alloyed and specials on demand*
- *Rounds : 6,35 a 127,00 mm.*
- *Squares: 12,70 a 50,80 mm.*
- *Hex: 12,70 a 50,80 mm.*
- *Grounds: 6,35 a 50,80 mm.*
- *Hulleds and polish: 20,00 a 140,00 mm.*
- *Round rolled steel up to 300 mm.*
- *Trepanned steels up to 24" x 10" x 3".*
